

BOULEVARD DECKING FOR VERTICAL PLATFORM LIFTS

COST-EFFECTIVE SOLUTION FOR VPL INSTALLATIONS WHERE THERE IS NO LANDING

Optional top landing gate

Avoid the cost and hassle of constructing a porch or landing to accommodate a VPL. Boulevard Decking is a modular, no-build solution that connects a VPL to an entry point.

- Durable all-aluminum construction will withstand the elements
- 5' x 5' and/or 5' x 6' platform sizes can be used for straight through or 90° turn applications
- Platforms can be combined to create larger landing areas
- Includes 36" handrails
- Decking can be configured from 15 5/8" landing heights up to 69 3/4"
- Optional steps can be attached as alternate access from VPL
- Boulevard decking is re-useable, can be moved to a new location
- Can accommodate VPL landing gates
